

# How to export Internet Bookmarks

## Internet Explorer Browser:

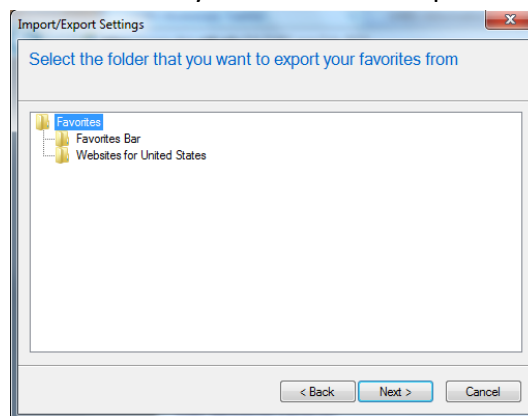

1. Press **Alt + F** select **Import and Export** from the file menu.
2. Select **Export to a File** and click “Next”

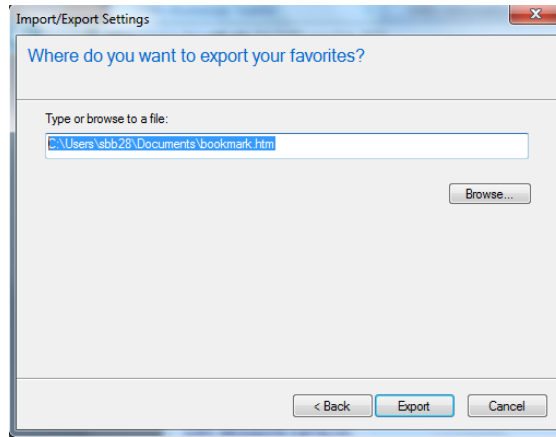

3. Now choose **Favorites** (you are also able to select cookies and feeds), and click “Next”

4. Select the folder which you want to backup and click “Next”

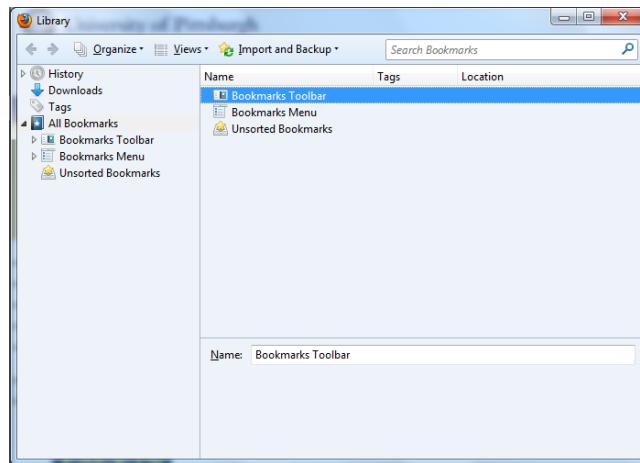

5. Finally, choose the destination where you want to save, and click **Export**. All favorites are now saved in HTML file.

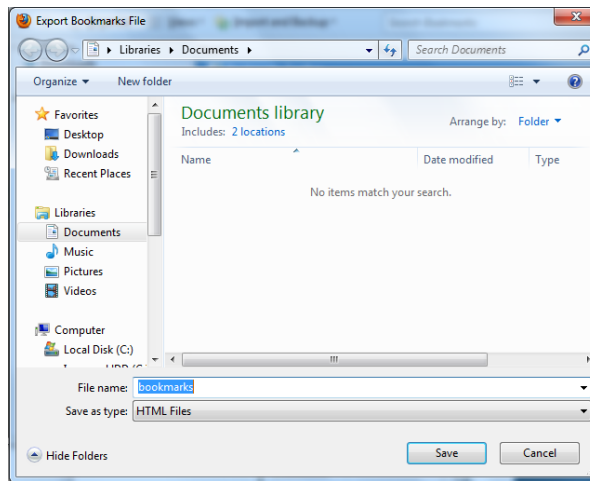

## Mozilla Firefox Browser

1. Press **Control+Shift+B** (all at once) to open the bookmark manager.
2. Click on **Imports and Backup** at the top of the dialogue box, and select **Export Bookmarks to HTML...**

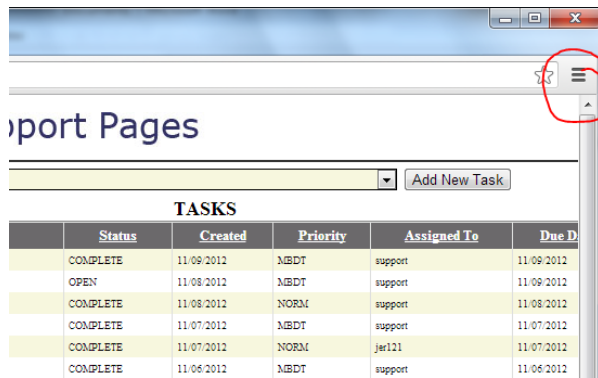

- Choose a destination and file name for your bookmarks, and click save.

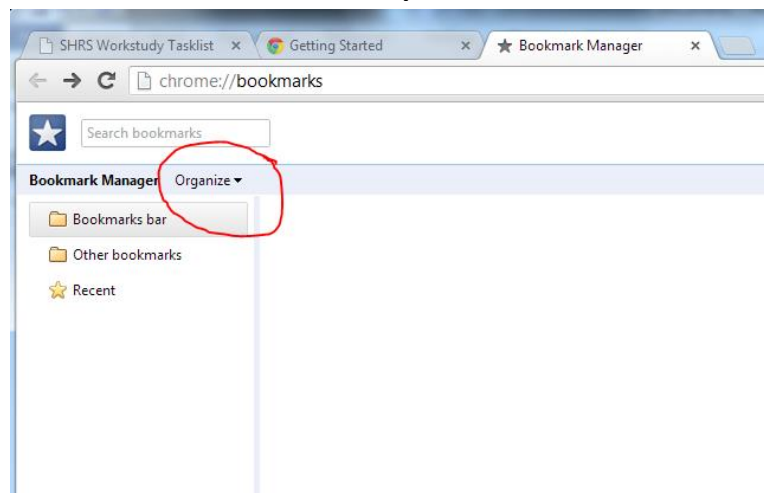

## Google Chrome Browser

- Select the File Menu at the top right hand of the browser.

- Click on **Bookmarks** → **Bookmark Manager**, and then click the **Organize** drop down menu. From the menu select **Export Bookmarks to HTML File**.

3. Select a destination folder and a type in a file name for the saved bookmarks.
