

ADVANCED VESTIBULAR PHYSICAL THERAPIST CERTIFICATION 2024-2025

Module 2

OBJECTIVES AND SCHEDULE

University of
Pittsburgh

Department of
Physical Therapy
School of Health and
Rehabilitation Sciences

OBJECTIVES

Concussion, vision, eye movements, Mal de Debarquement, cervicogenic dizziness psychological/pharmacological/surgical management

1. Recognize and be able to classify persons with vestibular migraine, Mal de Debarquement, concussion, and cervicogenic dizziness.
2. Be able to recognize various eye movements associated with peripheral and central vestibular conditions, both common and rare.
3. Be able to determine if the patient meets the criteria for vestibular migraine versus migraine and will understand medical management of vestibular migraine.
4. Be exposed to the most up to date information related to the recognition, diagnosis, and management of persons with Mal de Debarquement.
5. Understand the role of a neuropsychologist in the management of concussion.
6. Be able to apply evidence-based interventions for persons with vestibular hypofunction.
7. Be exposed to up-to-date physical therapy management of concussion based on the most recent guidelines and evidence.
8. Understand the value of the new CPG for concussion.
9. Be exposed to ocular conditions that may delay rehab outcomes of persons with concussion.
10. Be able to identify factors that affect recovery from a central or a peripheral vestibular disorder.
11. Be able to identify non-pharmacologic and pharmacologic interventions utilized in the management of persons with vestibular disorders.
12. Gain an understanding of the latest surgical management of persons with vestibular disorders including acoustic schwannoma, canal plugging, the vestibular implant, and dehiscence surgery.
13. Gain an appreciation for and an understanding of the potential benefits of the vestibular implant.
14. Be able to examine and develop a treatment plan for persons post mild head injury (concussion).
15. Be exposed to complex vestibular cases and interactive decision making via an online learning platform.
16. Better understand the relationship of vision and the vestibular system as it affects patient care and management.
17. Learn and apply the rules of the Barany consensus document for the analysis of eye movements via online interaction with the instructor.

SCHEDULE

All times Eastern Standard Time

October 15, 2024 (7 PM) Differential Diagnosis for "More Complicated" Conditions - Susan L. Whitney, DPT, PhD, NCS, ATC, FAPTA

OCTOBER 19, 2024

8:00-9:00 Barany Consensus Document About Eye Movements - Janet Helminski, PT, PhD

9:00-9:45 The Role of Vision in Vestibular Rehabilitation - Pamela M. Dunlap, DPT, PhD, NCS

9:45-10:15 Eye Movement Case Studies - Amy Cassidy, DPT, NCS

10:15-10:35 Questions and Answers with Drs. Helminski, Dunlap, and Cassidy

10:35-10:50 Break

10:50-11:15 Concussion: A Neuropsychology Perspective - Anthony P. Kontos, PhD

11:15-11:20 Questions and Answers with Dr. Kontos

11:20-12:15 Concussion: A Physical Therapist's Perspective - Anne Mucha, DPT, NCS

12:15-12:40 Concussion: Exertion Training - Victoria Kochick, DPT, NCS

12:40-1:30 Lunch

1:30-2:15 Concussion and Dual Tasking - David Howe, ATC, PhD

2:15-3:00 Questions and Answers with Drs. Mucha, Kochick, and Howe

3:00-3:10 Break

3:10-3:50 Dizziness in the Cervical Spine - Kathryn Schneider, PT, PhD

3:50-4:40 Cervicogenic Dizziness Cases - Julia Treleaven, PhD, BPhy

4:40-5:00 Questions and Answers with Drs. Schneider, and Treleaven

SCHEDULE

All times Eastern Standard Time

OCTOBER 20, 2024

8:00-8:55 Vestibular Implants and Surgical Options for Vestibular Disorders - Raymond Van der Berg, MD

8:55-9:35 Medical Management Including Pharmacologic and Non-Pharmacologic Interventions for Dizziness - Klaus Jahn MD

9:35-9:55 Questions and Answers with Drs. Van De Berg and Jahn

9:55-10:10 Break

10:10-10:50 Migraine and Vestibular Migraine - Thomas Lempert, MD

10:50-11:30 Sleep and Dizziness - Ryan Soose, MD

11:30-12:00 Case Studies with Dr. Whitney

12:00-12:40 Questions and Answers with Drs. Lempert, Soose, and Whitney

October 22, 2024 (7PM) Factors Affecting Recovery - Dr. Susan Whitney

November 19, 2024 (7PM) Fireside Chat with Drs. Whitney, Mucha, Hoppes, and Treleaven
