TEACHING

University of Massachusetts

Frank J. Manning Certificate in Gerontology Program - Teaching Assistant

1. Course Title: Elder Action Research (GERCTR 325) - 3 credits (2004)
Contact Hours; Number of Lectures: 2 hours per week; 1 lecture (16-week course)
Description: This in-person undergraduate certificate course introduced concept of participatory action research.
2. Course Title: Social and Economic Implications of Aging (GERCTR 220) - 3 credits (2004)
Contact Hours; Number of Lectures: 2 hours per week; 1 lecture (16-week course)
Description: This in-person undergraduate certificate course introduced students to sociological and financial factors impacting the daily lives of older adults.

Boston University

Post-Professional Masters in Occupational Therapy Program - Online Course Facilitator

3. Course Title: Health Promotion and Wellness (SAROT 610) – 3 credits (2005)
Contact Hours; Number of Lectures: 2 hours per week; 1 lecture (16-week course)
Description: This on-line graduate course focuses on developing a health promotion program grounded in theory. After an introduction to the field of public health and the role of occupational therapy in the area of health promotion and wellness, the course guides the student in the development of a program related to a health issue in his or her practice setting. The student will be introduced to frameworks and theories from public health and other disciplines and will then apply these as he or she develops a health promotion program.

New England Institute of Technology

Occupational Therapy Assistant Program – Adjunct Instructor

4. Course Title: Occupational Therapy in Geriatric Populations (OTA 250) – 3 credits (2007 – 2009)
Contact Hours; Number of Lectures: 2.5 hours per week; 1 lecture (10 week course)
Description: This in-person course is designed to provide students with an understanding of the unique needs of the older adult. Students will apply principles of physical rehabilitation and psychosocial practice in an effort to gain an understanding of occupational therapy with geriatric clients. Students will learn therapeutic interventions aimed at both prevention of dysfunction and restoration of health in working with elders. They will demonstrate an understanding of occupational role function in later life. Students will study treatment interventions, adaptive techniques, and environmental technologies utilized to remediate dysfunction and maximize independence in elders. They will discuss cultural issues and professional ethics as they relate to this population.
5. Course Title: Development of Human Occupation Across the Lifespan (OTA 122) – 4 credits (2008)
Contact Hours; Number of Lectures: 3.5 hours per week; 2 lecture (10-week course)

Description: Using the Model of Human Occupation as a framework, the student will explore normal human development, physically, socially, behaviorally, and cognitively in relationship to environment and culture. Occupational roles throughout the lifespan will be discussed.

6. Course Title: Principles of Therapeutic Intervention for Adults (OTA 243)- 3 credits (2008)
Contact Hours; Number of Lectures: 4.5 hours per week; 2 lab sessions (10-week course)
Description: This course is the lab for OTA 240. Students participate in assessment, treatment planning and implementation of occupational therapy for adults. Students plan, grade and perform enabling, adjunctive and purposeful activities to facilitate performance components and function of the adult client in all performance areas. Adaptation to person, task and environment will be incorporated into course content.
7. Course Title: Practice Issues of the Occupational Therapy Assistant (OTA 255) – 2 credits (2008)
Contact Hours; Number of Lectures: 14 hours per week; 1 lecture (3-week course)
Description: This course provides case-based learning to focus the student on treatment planning and clinical reasoning in a variety of practice environments. The emphasis is on collaborative teamwork and self-directed learning. Course content will focus on management issues, practical roles, and responsibilities of the entry-level occupational therapy assistant. Clinical and administrative documentation and legal and ethical issues will be addressed. The objective of the course is to transition the student from the classroom to the practice environment and helps prepare the student for the national certification examination.

18. Course Title: Independent Study (OT 2199)
Contact Hours; Number of lectures: 3 hours; 0 lectures (16-week term)
Description: Students explored how to develop, execute, analyze, and disseminate and clinically meaningful literature review question and translate findings into clinical setting
Year(s), Number of students: Spring 2019, 2 Masters of Occupational Therapy students

University of Pittsburgh

School of Health and Rehabilitation Sciences

Doctor of Philosophy in Rehabilitation Science Program – Primary Instructor

19. Course Title: Independent Study (OT 2199)
Contact Hours, Number of Lectures: 2 hours; 0 lectures (16-week term)
Description: Provided student with the opportunity to explore in depth the theoretical foundations of health services research and conceptual frameworks of implementation science
Year(s), Number of Students: Summer 2018, 1 Doctor of Philosophy student. Summer 2019, 2 Doctor of Philosophy students. Spring 2020, 1 Doctor of Philosophy student.
20. Course Title: Doctoral Seminar (HRS 3000)
Contact Hours, Number of Lectures: 1 hour per week, 0 lectures (16-week term)
Description: Faculty and students in the rehabilitation doctoral program participate in this seminar series. Research is presented and critiqued by faculty and students. Topics related to grantsmanship, ethics in research, and issues related to survival in an academic/research environment are also addressed in this seminar series. Doctoral students must present their research for critique by faculty prior to their dissertation defense.
Year(s), Number of Students: Fall 2018, 5 Doctor of Philosophy students. Spring 2020, 6 Doctor of Philosophy students; Fall 2021, 6 Doctor of Philosophy students; Fall 2024, 4 Doctor of Philosophy students.
21. Course Title: Specialized Preceptorship: Education (HRS 2591)

- Contact Hours, Number of Lectures: 2 hours, 0 lectures (16-week term)
Description: Provide students with the opportunity to develop, execute, and revise an educational module that will be delivered to graduate students.
Year(s), Number of Students: Fall 2019, 1 Doctor of Philosophy student. Summer 2020, 2 Doctor of Philosophy students.
22. Course Title: Directed Readings in Occupational Therapy (**HRS 2504**)
Contact Hours, Number of Lectures: 2 hours, 0 lectures (16-week term)
Description: Provide students with the opportunity to be immersed in the current evidence-based literature for a focused topic.
Year(s), Number of Students: Fall 2019, 1 Doctor of Philosophy student.
23. Course Title: Core Concepts in Disability and Rehabilitation Science I (**HRS 3003**)
Contact Hours, Number of Lectures: 2 hour per week, 8 lectures (16-week term)
Description: This is the first of two courses examining core knowledge in disability and rehabilitation sciences. Throughout this first semester, we will explore, discuss, and apply key theoretical frameworks and conceptual models that can be used to examine key disability and rehabilitation science questions across the research continuum. We will examine how these concepts are applied in ongoing research within the field of rehabilitation sciences and how they can provide a foundation for research that spans the continuum from bench to bedside. Students will learn through faculty presentations (from research programs throughout the School of Health and Rehabilitation Sciences), facilitated discussion, assigned readings, written papers, oral presentations, and peer-review of written products.
Year(s), Number of Students: Fall 2019, 12 Doctor of Philosophy students. Fall 2020, 9 Doctor of Philosophy students, Fall 2021, 7 Doctor of Philosophy students.
24. Course Title: Core Concepts in Disability and Rehabilitation Science II (**HRS 3005**)
Contact Hours, Number of Lectures: 2 hour per week, 8 lectures (16-week term)
Description: This is the second of two courses examining core knowledge in disability and rehabilitation sciences. Throughout this semester, we will explore, discuss, and apply key theoretical frameworks and conceptual models that can be used to examine key disability and rehabilitation science questions across the research continuum, building on the discussion of last semester (i.e., stages 0-2) and including Stages 3 to Stage 5 within the context of the ICF Taxonomy. We will examine how these concepts are applied in ongoing research within the field of rehabilitation sciences and how they can provide a foundation for research that spans the continuum from bench to bedside. Students will learn through faculty presentations, facilitated discussion, assigned readings, written papers, oral presentations, and peer-review of written products.
Year(s), Number of Students: Spring 2020, 12 Doctor of Philosophy students. Spring 2021, 9 Doctor of Philosophy students, Spring 2022, 7 Doctor of Philosophy students.

Doctor of Philosophy in Rehabilitation Science Program – Collaborating Instructor

25. Course Title: Core Concepts in Disability and Rehabilitation Science II (HRS 3005)
Contact Hours, Number of Lectures: 2 hour per week, 8 lectures (16-week term)
Description: This course is the second course in a two-course sequence examining core knowledge in disability and rehabilitation sciences. In this second course, we will focus on individual and contextual factors that influence disability and rehabilitation, and implications for research. We will examine how these concepts are applied in ongoing research within field of rehabilitation sciences. We will also synthesize concepts and principles and discuss their application in individual student research programs. Students will learn through faculty presentations (from among the various research programs throughout the School of Health and Rehabilitation Sciences), facilitated discussion, assigned readings, short written papers, short oral presentations, and peer-review of written products.
Year(s), Number of Students: Spring 2019, 7 Doctor of Philosophy students.
