Assistive technology (AT) refers to any device or system used to increase, maintain, or improve the functional capabilities of persons with disabilities. CART can assist with:

- Enhance activities of daily living
- Determining home and school accommodation needs

The Center for Assistive and Rehabilitative Technology at Hiram G. Andrews Center (CART) offers AT specialists who evaluate customers’ abilities and match them with appropriate assistive technology to maximize independence in the home, school and/or work environments. CART offers a consumer centered atmosphere throughout the evaluation, equipment recommendation, and training process.

Services at the Center for Assistive and Rehabilitative Technology at the Hiram G. Andrews Center include evaluation, recommendation, and training in the following areas:

- Positioning & mobility
- Computer access
- Electronic aids of daily living
- Driver evaluation & vehicle modification
- Devices for activities of daily living
- Devices for visual impairments
- Devices for auditory impairments
- Ergonomics
- Worksite accommodations
- Home modifications
- School modifications
- Disability support services
- Peer counseling
- Customized training

The Center for Assistive and Rehabilitative Technology is comprised of

**Assistive Technology Labs/ Evaluation Areas**

providing the opportunity to explore and trial various devices for alternate computer access, positioning, wheeled mobility, cognitive technologies, devices for the visually impaired, deaf and hard of hearing needs, and electronic aids for daily living.
