Satisfaction with Curriculum
The Department of Occupational Therapy faculty at the University of Pittsburgh gathers measures of satisfaction from the various stakeholders invested in the success of our MOT program. These stakeholders are MOT students, fieldwork supervisors of MOT students, MOT graduates and their employers.

Fieldwork Supervisors
- As part of their professional training, all MOT students complete fieldwork experiences in the clinical environment. Clinical fieldwork supervisors are an extension of our faculty, and provide on-site supervision and training for our MOT students in the clinical setting.

- Data gathered from fieldwork supervisors' evaluations of our MOT students indicate that University of Pittsburgh students consistently demonstrate satisfactory performance during fieldwork.
