**Notes:**

1. The PAS Hybrid Program uses flat-rate tuition; there is no resident/non-resident tuition differential.
2. Tuition and University/program fees are billed by the University. Other living and incidental costs are estimates and are generally paid directly by the student.
3. Estimated living and incidental expenses are subject to change and may vary substantially based on individual circumstances and clinical placement location.
4. Cost-of-living estimates shown here use three terms in the didactic year and three terms in the clinical year.
5. Transportation cost-of-living estimate is applied only to the clinical year, per the current cost assumptions.
